

ABSTRACT

Employing Stickiness and Stock Prices for Employee Benefits

5 The invention comprises defining a time interval, providing an
employee benefit (e.g. a stock option, SAR, or other employee
benefit related to stock prices), providing a supported price for
the employee benefit, and calculating a value for the employee
benefit, based on the supported price. For example, the following
are provided: methods for providing an employee benefit, and
10 providing a supported price for the employee benefit, systems for
executing such methods, and instructions on a computer-usable
medium, for executing such methods.
